

APCB Supplier EDI Connectivity

Supplier Form

1. Instructions

- This form should be completely filled and returned to the APCB contact that provided this form.
- The APCB contact that provided this form will provide information on the validation process and implementation dates, and EDI implementation guidelines.
- APCB provides the possibility to establish EDI connectivity through OFTP over an ISDN connection (technical details below).
- APCB will be the initiator of the communication when delivering a Supplier Schedule. The supplier is expected to initiate the communication when delivering an ASN.
- APCB EDI standards are EDIFACT D97A and VDA. The messages that can be exchanged are DELFOR, DELJIT and DESADV D97A, or VDA4905, VDA4915 and VDA4913.

2. Communications
